## POSITIVE AND DEFINITIVE ARCHIVAL PROTECTION

Just about all of us possess unique archival material, kept for hobby, professional, financial, or sentimental reasons. Whatever the value of documents, photographs, maps, pictures, postcards, labels, stamps, coins and other various precious memorabilia is, you may find it important and worth taking time and effort to ensure they stay in the best possible condition for the future.

Whether you are a private or professional collector, family historian, librarian, archivist, photographer or conservator, you will find many useful items on our website to protect your media.

SECOL is proud to supply the best quality Archival Polyester Enclosures in the world and our Polyester acid-free film perfectly fills, the often conflicting needs of conservation, protection and accessibility.

It is a chemically inert, extremely clear and immensely strong material which uniquely combines security, long-life functional use and versatility for all kinds of material formats.

We do our best to hold the widest range of products in stock to provide you with prompt delivery.

We are also able to discuss your own ideas whether they are about a special size, colour, or shape, while still maintaining the highest quality of both our manufacture and service.

Please do not hesitate to mail or telephone us with your bespoke requirements.

# I Binders and Portfolios

The Secol Binders & Portfolios give the ultimate solution for bringing order, accessibility and professional presentation to mixed materials and formats.

The Standard A-S, Boxboard, Collection, Panoramic & Certificate Binders use the principle of a "binder-within-a-box" to provide primary protection and useful logical order with archival storage. Binders with separate Slipcases provide all-round protection and are an alternative to the fully enclosed Standard Binders.

The Professional Archival Portfolios are available in different formats, styles and volumes to meet varying requirements. They offer a totally safe and flexible presentation systems for browsing, storage and display of digital or conventional prints from A4 to A2.

Portfolios are portable, smart and offer exceptional image presentation. Mini Portfolio is complete with pages for 20 images.

Zip Case Portfolios are supplied with or without pockets.

Portfolio Boxes come with 25 pockets or covers but will accommodate a further 50 items.

Pockets and Covers are manufactured in 75 Micron Polyester and they fit exactly inside the frame of the box.

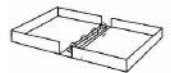

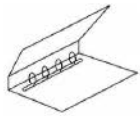

*For Filing Pages for Binders & Portfolios turn to page 7.*

*For Mounting Solutions turn to page 40.*

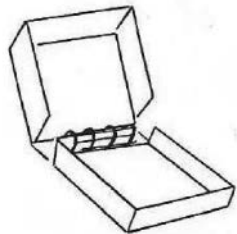

*For Labels, Marker Pens and Gloves go to Accessories on page 42.*

*Binders are available in many other sizes as Bespoke Service.*

*For a Request Form turn to page 47.*

## 1 Binders

### BOXBOARD BINDERS

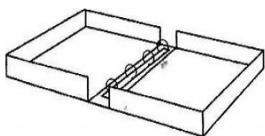

The Boxboard A4 and A3 Format Binders are made from the highest grade Museum Boxboard.

The Die Cut Binder in 1250 Micron folding boxboard is available in a Blue-Grey or Taupe colour.

Binders are a solid and long-lasting solution for storage, their "clamshell" closures provide a double seal against the light, dust and dirt when not in use. They have a 4 ring binder mechanism which opens up flat and permits 100% access to the material.

Binders can be stored either flat or upright and are perfect to use with: Filing Pages and the Acid-Free Mounting Systems. Capacity is 100 filing pages.

NAME	FORMAT	RINGS	COLOUR	PACK OF	REF. NO	SUITABLE FOR
Boxboard Binder	A4	4	Blue-Grey	1	GBA4	Vertical and Hanging A-S Pages, Binder and Security Style A4 Format Pages
Boxboard Binder	A4	4	Taupe	1	GBA4T	Vertical and Hanging A-S Pages, Binder and Security Style A4 Format Pages
Boxboard Binder	A3	4	Blue-Grey	1	GBA3	Binder & Security Style Display A3 Format Pages
Boxboard Binder	A3	4	Taupe	1	GBA3T	Binder & Security Style Display A3 Format Pages
B. S. Boxboard Binder	Bespoke		Blue-Grey	1	BSGB	Bespoke Service
B. S. Boxboard Binder	Bespoke		Taupe	1	BSGBT	Bespoke Service

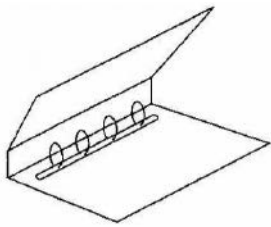

### STANDARD A-S BINDERS

The Standard A-S Binders have a solid frame and their principle of a "binder-within-a-box" perfectly keep dirt, dust and light out.

They are lined and covered with 2 standard coverings, Royal Blue Library Buckram (cloth based) and Royal Blue Bookbinder's Milskin.

The Standard A-S Binders open up flat with the ring binder on the inside of the drop-spine and permit 100% access to the stored material. Capacity is 50 filing pages.

NAME	FORMAT	RINGS	COLOUR	PACK OF	REF. NO	SUITABLE FOR
Standard A-S Binder	A4	4	Blue Milskin	1	COMA4	Vertical & Hanging A-S Pages, Binder & Security Style A4 Format Pages
Standard A-S Binder	A4	4	Blue Buckram	1	ASCOMA4B	Vertical & Hanging A-S Pages, Binder & Security Style A4 Format Pages
Standard A-S Binder	A3	4	Blue Milskin	1	COMA3	Binder & Security Style A3 Format Pages
Standard A-S Binder	A3	4	Blue Buckram	1	COMA3B	Binder & Security Style A3 Format Pages

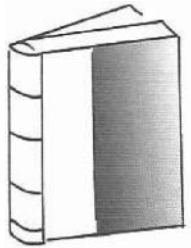

## BINDERS WITH SLIPCASES

Binders with Slipcases are an alternative to the fully enclosed Standard Binders. The high capacity 4-ring binder will accept A-S pages within its 45mm diameter "D" ring mechanism fitted to the back cover.

The archival board is covered with maroon "Milskin" and lined with white barrier paper, whilst a separate slipcase provides all-round protection from light and dust. Capacity is 100 filing pages.

NAME	FORMAT	RINGS	COLOUR	PACK OF	REF. NO	SUITABLE FOR
Binder	A4	4	Maroon	1	BD4RP340300	Filing Pages For Binders & Portfolios, Mounting Systems
Slipcase	A4	-	Maroon	1	SCBD340300	A4 Binder Maroon

B.S. Slipcase	A3	-	Maroon	Bespoke	BSA3SC	Bespoke Service.

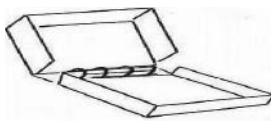

## COLLECTION BINDERS

The Collection Binders are hand-crafted from the finest museum-quality conservation grade materials and bound in attractive dark green library buckram with a contrasting russet colour quarter spine binding and gold lining.

They provide the ideal preservation environment which excludes light, harmful dust and pollution, and help to stabilise temperature and humidity - all important factors in preservation.

With internal barrier lining and high-quality British standard four-ring binder mechanism and the drop-spine design provides easy page access and selection. Capacity is 100 filing pages.

NAME	FORMAT	RINGS	COLOUR	PACK OF	REF. NO	SUITABLE FOR
Collection Binder	A4	4	Green Buckram	1	CCA4B	Filing Pages For Binders & Portfolios and Mounting Systems.
B.S. Collection Binder	A3	4	Green Buckram	1	BSCCA3B	Filing Pages For Binders & Portfolios and Mounting Systems.

## CERTIFICATE BINDERS

The Certificate System is based on conservation quality and traditional clamshell style binder, and easy access 75 Micron polyester Certificate Pages. The pages are manufactured in a Security Style to facilitate insertion without damage.

The long landscape format clamshell Certificate Binders are made from acid-free museum blue-grey or taupe colour board.

A4 ring binder system is mounted within the box supporting the pages on their long side for ease of viewing and maximum stability.

*For matching Certificate Pages turn to page 9.  
For certificate size of Archival Interleaves without Tabs go to Bespoke Service on page 44.*

Certificate Binder	440 x 330 x 57mm	4	Blue-Grey	1	GBC	Certificate Pages
Certificate Binder	440 x 330 x 57mm	4	Taupe	1	GBCT	Certificate Pages

## PANORAMIC BINDERS

Panoramic Binders are designed to promote easy access and display without compromising the integrity of the unique source material. The elongated clamshell box offers the perfect acid-free protection in high quality Museum board in grey-blue and taupe colour.

There are three independent ring-binder mechanisms to provide continuous support for crystal clear Panoramic Pages.

The polyester pages are manufactured in a Security Style to facilitate insertion without damage.

*For matching, Panoramic Pages turn to page 9.  
For panoramic size of Archival Interleaves without Tabs go to Bespoke Service on page 44.*

Panoramic Binder	1250 x 365 x 55mm	12	Taupe	1	SPASBT	Panoramic Pages

## 2 Portfolios

### MINI PORTFOLIO SYSTEM

The Mini Portfolio System provides a perfect presentation solution for 20 images in one neat and portable package. There is a smart 3mm black bookbinding with encloses 4 miniature stainless steel rings and 10 Display Pages for 20 images. Pages are Security Style with a smooth welded edge on 3 sides and the opening on the punched side.

NAME	FORMAT	RINGS	COLOUR	PACK OF	REF. NO	APPLICATION
Mini Portfolio with 10 Pages	A4	4	Black	1	MPA4	Presentation of 20 images in 10 display polyester Pages

### ZIP CASE PORTFOLIOS

The Zip Case Portfolios offer a totally safe and flexible presentation system for prints in A4, A3 and A2 formats.

Handmade in hard wearing solid board finished with Black Library Buckram cloth inside and out they are superbly trimmed with tailored webbing edges and anodized metal corner protectors. A practical retractable handle completes the professional presentation.

Zip Case Portfolios are available with or without 25 pages. Additional packs of 25 or 50 Display Pages for Portfolios are also available.

*Turn to page 8 for Binder & Security Style Pages.*

NAME	FORMAT	DIMENSIONS	RINGS	COLOUR	PACK OF	REF. NO	APPLICATION

## 3 Portfolio Boxes with Pockets & Covers

The Presentation Portfolio Boxes are an alternative to the Mini Portfolio System and Zip Case Portfolios. Boxes are hand-made to conservation standards, from acid-free archival boxboard and covered in hard-wearing library buckram cloth, bonded with neutral pH acrylic adhesive. They are additionally lined with a protective white barrier and feature a double clamshell edge.

When closed, the portfolio box shields prints from light and dust. When opened, the special drop-spine construction allows the box to lay perfectly flat.

Each box portfolio is 38mm deep and comes with 25 pockets or covers in 75 Micron polyester but will accommodate a further 50 items. The strength, clarity and inert chemistry of polyester make them the safest choice for the future longevity of every collection.

Pockets are open on one short side and welded on the other three, while covers are welded on two adjacent sides with a shape of an L and open on the other two. Pockets and Covers are not punched.

Portfolio Boxes are available in black, white, blue, red, green and many other colours. Please feel free to contact us to choose any required colours.

*For a Request Form turn to page 47.*

## II Filing Pages for Binders & Portfolios

The Filing Pages for Binders & Portfolios are acid-free with proven archival safety, superb clarity and strength.

They are manufactured in three styles:

1. Binder Style Files have a separate binding and punched edge with an access to material from the top. Standard A-S Vertical Pages are manufactured in that style except AS203S4SE and AS204S7SE which are open from the outside edge.
2. Security Style Files are open along the punched edge. Material is secure on all sides when placed in a binder. Certificate, Panoramic and Display Pages for Portfolios are manufactured in Security Style.
3. Hanging Style Files have a separate binding edge and an access to material from that edge. When Hanging Bars are placed into the punched edge, files can be used in conventional cabinets or the Secol Hanging File Storage Unit. Hanging Style Files also adequately fit our range of Binders & Portfolios.

All pages are a standard 260mm x 317mm overall with 4 holes. All pockets' dimensions are given with the open dimension first.

Polyester Pages are available in a wide range of pockets' dimensions as bespoke service.

*For a Request Form turn to page 47.*

*For A4 Inserts, and Strips go to Mounting Solutions on page 40.*

*For the Archival Interleaves to provide a protective and visual barrier between pages or sections turn to page 42.*

### 1 Standard A-S Vertical A4 Format Pages

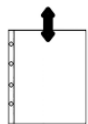

The Standard A-S Vertical A4 Format Pages are produced from exclusive high-clarity, chemically inert polyester material. Uniquely, they protect not only against handling damage such as dirt and fingerprint marking, but most importantly against chemical damage and rapid deterioration caused by acidic attack, present not only in the atmosphere, but particularly in ordinary storage materials including many plastics and especially PVC.

Pages provide also long-term protection against fading and colour loss, yellowing, embrittlement, and eventual destruction.

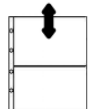

A comprehensive range of page designs allows the system to be tailored to suit a diverse range of items and a one standard A4 overall page size ensures the uniformity of storage as collections are extended.

## 2 Binder Style Display Pages

Binder Style Pages are manufactured from glass-clear archival 75 Micron Polyester film. They display and enhance material with exceptional clarity, sharpness and colour rendition.

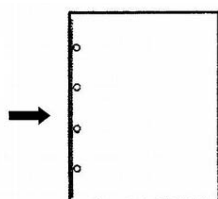

Pages are punched with 4 holes with a smooth welded edge on 3 sides and opening on the top edge.

Binder Style Pages are ideal if material is regularly replaced. All pages' dimensions are given with the open dimension first.

*For Binders and Portfolios turn to page 4.*

### III Hanging File Storage System

The Secol Archival quality Hanging System offers a highly space efficient and easily indexed means of archiving large quantities of material with the benefit of portability to individual sections of collections.

Hanging File Storage Unit uniquely combining the advantages of fixed Hanging Files and portable binder systems in a free-standing box. The flip top lid opens in conjunction with protective front drop-flap to provide ready access to the files inside. Each unit holds about 50 hanging files.

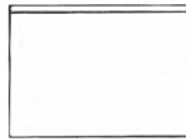

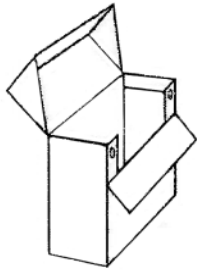

Hanging File Flysheets provide extra protection where hanging files are accessed regularly. These neat polyester sheets fit all 247x350mm files, and are supplied with an acrylic adhesive strip for easy application along the top of edge of the file.

Hanging Bars are supplied in standard format with anti-friction coating at each end.

Index Tabs are clear polyester material complete with adhesive strip and paper insert for permanent indexing of the collection.

Hanging A-S A4 Format Pages and Wide Format Hanging Files are manufactured from acid-free polyester to provide proven long-term archival storage.

For Hanging A-S A4 Format Pages turn to page 10.

## IV Polyester Pockets, Covers & Folders

The Secol Standard Pockets, Covers & Folders are manufactured from Polyester film that provides the highest clarity, optical rendition and protective strength.

They are not punched with any holes and will fit the wide range of acid-free Boxes.

They are available in a wide range of formats, but if the size you require is not listed please feel free to contact us.

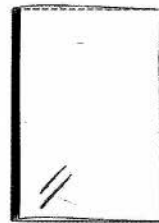

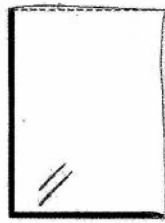

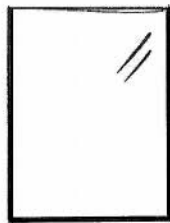

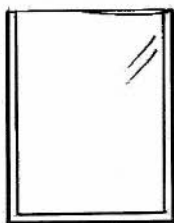

*For a Request Form turn to page 47.*

*For wide range of polyester Sleeves and Sleeve Rolls turn to page 23.*

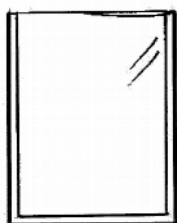

*For Pockets with filing holes go to Filing Pages For Binders & Portfolios on page 7.*

*For A4 Inserts, and Strips go to Mounting Solutions on page 40.*

*For Gloves, Labels, Marker Pens etc. go to Accessories on page 42.*

### 1 Comprehensive "HC" Archival Pockets

The Comprehensive Archival Pockets enable extensive collections to be protected and stored economically. Polyester "HC" material is completely inert and acid free which means absolutely safe for photographic and paper protection.

They also offer colour rendition and display properties which are difficult to fault. Pockets are ideal for long term storage of documents, postcards, ink jet prints, photographs and any other paper or photographic material. Available in most popular sizes they can be also manufactured in various dimensions and a quantity to meet different requirements. In specifying dimensions the open side is always the first dimension.

### 3 STANDARD POLYESTER COVERS

The Secol Standard Polyester Covers are completely inert and acid-free. They are ideal for photographic and paper long-term archival storage. Covers are welded on two adjacent sides with a shape of an L and open on the other two for easy access to surface. They are not punched.

## 4 STANDARD POLYESTER FOLDERS

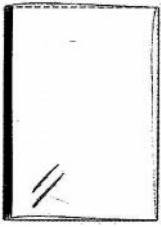

The Secol Standard Polyester Folders are completely inert and acid-free. They are welded on 1 long side and open on the other three for a simple or temporary enclosure. They are not punched. Many other formats are available as bespoke service.

*For Folders with clip-lock fold on opposite side turn to Trantec® Sleeves on page 28.*

## V Polyester Sleeves & Sleeve Rolls

The Secol Polyester Sleeves are manufactured from glass-clear Polyester film that provides superb quality and reliability.

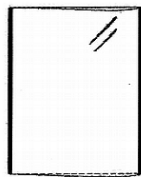

Sleeves are open on two short sides and welded on the 2 long sides. They are not punched. Trantec® Sleeves are welded on one long side and opens up completely for simple and safe insertion. The sleeves are then closed and a neat welded "captive flap" locks over the opposing edge to retain the contents safely inside.

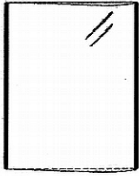

The Transleeves, Standard and Trantec® Sleeves offer wide range of formats, sizes and styles to meet varying requirements.

The archival grade Polyester is also available in a wide variety of unwelded formats. The Standard Rolls are available in 75 Micron Polyester but Secol are able to offer Polyester material in exactly the right sizes and other thicknesses as bespoke service.

## 2 Postcard Sleeves

Postcards offer fascinating insights into social history and many have become extremely valuable. The use of PVC postcard pockets damage both the view and the physical integrity of the print surface, but Secol Postcard Sleeves offer super clear vision to both sides and proven archival safety.

Postcard Sleeves are open on two short sides and welded on the two long ones. They are not punched. Postcard Sleeves are available in other sizes as Bespoke Service.

## 3 Transleeves®

The Secol Polyester Transleeves® are the most effective means of preserving all photographic images including transparencies, negatives and prints, analogue or digital.

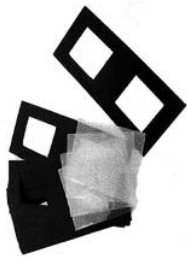

Each Transleeve® is precision manufactured from Acid-Free Secol archival Polyester, welded on two long sides and open on the short sides. They provide superb optical rendition and maximum visual access. Transleeves are available in Packs of 100. Packs of 50 are available as Bespoke Service.

#### 4 Colourview® Sleeves & Black Masks

The Colourview® Sleeves are often preferred for the viewing of transparencies as they are glass clear at the front and soft diffused on the reverse to facilitate comfortable viewing without the need for a light box. Each Colourview® Sleeve is precision manufactured from acid-free Secol Polyester, welded on two long sides and open on the short sides. They provide superb optical rendition and maximum visual access.

Colourview® Sleeves are complete with the single-fold Black Masks that are designed for stylish appearance and total protection of single frame transparencies. The black frame and diffused background concentrate the eye clearly on the image providing a pleasing and professional finish. Colourview® Sleeves are available in packs of 25 with masks.

## 5 Trantec® Sleeves

Trantec® Sleeves were developed to allow faster and easier insertion of film or prints inside the protection of Secol archival 50 Micron polyester sleeving.

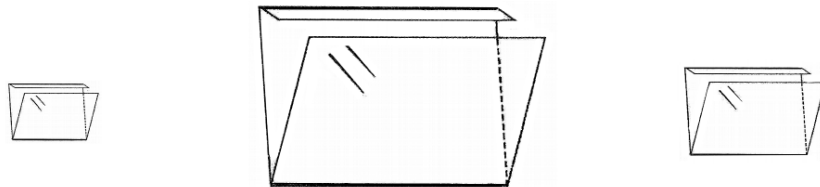

Each Trantec® Sleeve is welded on one long side and opens up completely for simple and safe insertion. The sleeve is then closed and a neat welded "captive flap" locks over the opposing edge to retain the contents safely inside and protected.

Trantec® Sleeves are available in a wide range of dimensions as Bespoke Service.

## 6 Stereo Sleeves

With the rarity and value of Stereo Prints, handling them for viewing can present a danger of damage. The Secol Polyester archival Stereo Sleeves can be left permanently in place to protect the stereo yet allow complete 100% visual access.

NAME	DIMENSIONS	CATEGORY	PACK OF	REF NO	APPLICATION
Stereo Sleeves	93 x 180mm	50 Micron	50	SL93180Y50H	Stereo Prints, Negatives
Stereo Sleeves	93 x 180mm	50 Micron	100	SL93180Y50	Stereo Prints, Negatives

## 7 Divided Index Sleeves without Cards

Versatile sleeves with one pocket for 5 x 4" images and the other pocket for a 44 x 105mm index card (not supplied) offer excellent solution for collection of prints where material is being constantly accessed and moved. This system ensures that the index always stay fixed to the material yet does not interfere with the visual access.

## 8 Transleeve® Colourview® & Trantec® Rolls

Secol Glass Clear Transleeve® and clear at the front with frosted back Colourview® Sleeves are available in roll lengths for commercial or professional storage.

Sleeves are normally in 15mtr lengths, although other lengths are available by quotation. Please feel free to contact us for bespoke quotation.

The Trantec® Rolls with captive flap are particularly useful for panoramic shots or where it is convenient to protect a complete film without cutting it into frames.

Sleeve Rolls offer the means of protecting long strip formats without the possibility of stress or damage.

## 2 Contact Print Sheets

Polyester Contact Print Sheets are an ideal permanent storage medium for unmounted film. As their name implies, the high clarity of Secol Polyester enables contact printing of the entire sheet without the need for the film to leave its protective enclosure. Archival safety, high definition viewing and reduced handling time insure the safety of your images.

## 4 Tecs® Sleeves

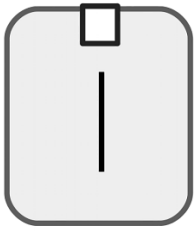

Secol TECS® Sleeves have been protecting mounted slides for generations. The optical clarity of polyester means that the snug fitting sleeve can be fitted to a mounted slide and left permanently in position.

Valuable original material can be handled regularly without the risk of scratches, grease or fingerprints contaminating the surfaces, yet still not compromise the viewing of the image. When you send out valuable original material for unsupervised handling, Secol TECS represent the very best insurance policy for the Photographer or Library.

Secol TECS® are available in all standard film sizes and will fit standard card and plastic mounts.

NAME	DIMENSIONS	ROWS	FRAMES	PACK OF	REF NO	APPLICATION
TECS® Sleeves	2 x 2"	2 x 2" Mount		100	TE0202	35mm film

## IX Acid-Free Boxes, Holders and Protectors

The Secol Boxes are manufactured from the highest grade acid-free Museum Boxboard and Die-Cut Corrugated material that combines exceptional strength with light weight and a neutral pH as a solution for bulk archives.

Boxes can be made in single piece clamshell" and upright style or using separate lift-off lid design. Standard Archival Boxes are supplied fully assembled and ready for immediate

use whilst Die-Cut Corrugated Boxes are supplied flat for self-assembly.

Boxes are available in exact bespoke size to use space efficiently and minimize internal movement of storage material.

They can be made for any individual requirements.

### 1 Standard Archive Boxes

Standard Archival Boxes are manufactured from the highest grade acid-free and lignin-free Museum Boxboard 1300 Micron in Taupe or Blue-Grey Colour. They are laminated white inside with EVA adhesive only and slightly Calcium Carbonate buffered. Boxes can be made in single piece "clamshell" design or using separate lift-off lids.

The Vizi Lift-Off Lid Style Boxes are made in two pieces with transparent lid. Boxes are supplied fully assembled and ready for immediate use.

Standard Boxes are available in a wide range of sizes to fit snugly with high clarity Polyester Pockets, Covers, Folders and Sleeves as they are perfect for storage, transportation and presentation. These smart and safe boxes will hold up to 100 prints and stack neatly on shelves building a well-protected fully indexed print archive.

Boxes can be also made for individual books, glass plate negatives, inkjet prints and anything that requires safe and long-term storage in solid boxes. Simply let us have dimensions and a quantity, and prices will be provided. Boxes in 1100 Micron also are available as bespoke service.

## 2 Die-Cut Corrugated Boxes

Die-Cut Corrugated Boxes are practical solution for bulk archives. They provide safe, long-term storage for items up to A1 size. The corrugated material in a light tan colour is acid-free and combines exceptional high strength with light weight. Boxes are supplied completely flat for self-assembly so they save significant space prior to installation.

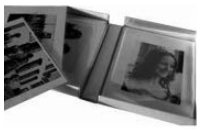

They are manufactured in two styles, Clamshell and Upright. The Clamshell style is designed to be used in conjunction with Polyester Pockets, Covers, etc. Labels and Spine Label Holders. Their design means there are four layers of corrugated board around 3 sides so the clamshell boxes can be stored comfortably in a self-supporting stack.

The Upright style is designed for material in files or folders stored upright. The Corrugated Boxes are all supplied in packs of 10.

NAME	INTERNAL DIMENSIONS	CATEGORY	REF. NO	SUITABLE FOR/APPLICATION
Clamshell Boxes	315x245x60mm/A4	Die-Cut Corrugated Board	BA31524560	Polyester enclosures/Bulk archives

Upright Boxes	385x114x260mm/Foolscap	Die-Cut Corrugated Board	BA385114260	Material in files, folders etc./Bulk archives

### 3 Memory Boxes

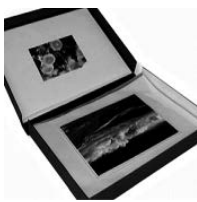

The Memory Box with 25 beautifully clear Polyester Pockets is designed for those special occasions such as Christenings, Weddings, Birthdays and Anniversaries. The system is based on a hand-made, museum style box covered in textured ivory bookcloth and lined with acid-free heritage paper.

The pockets are not fixed into the box, so clients can handle and arrange the images as they like, whilst the stunning display grade polyester, ensures that the images are well protected at all times. Acid free Mounting Inserts (see page 40) can also be added for using smaller prints within a visual frame.

NAME	DIMENSIONS	CATEGORY	REF. NO	SUITABLE FOR/APPLICATION
Memory Box & 25 Pockets	240x315x38mm/A4	Ivory Bookcloth, Polyester	WBA4IV	Presentation of special occasions, Storage

Memory Box without Pockets	240x315x38mm/A4	Ivory Bookcloth	WBA4IVNP	Presentation of special occasions, Storage

### 4 Presentation Boxes

Professional Portfolio Box is hand-made from acid-free archival boxboard and covered in hard-wearing black library buckram cloth, bonded with neutral pH acrylic adhesive. It is lined with a protective white barrier and features a double clamshell edge which fits snugly together.

For each format there is a perfectly matched polyester pocket to fit exactly inside the protective frame of the box. When closed the portfolio box shields valuable prints from light, dust, dirt and harmful atmospheric gases. When opened, the special drop-spine construction allows the unit to lay perfectly flat for individual inspection of each print. Each box portfolio comes with 25 pockets if required, but will accommodate a further 50 pockets.

### 5 Archive Holders and Corner Protectors

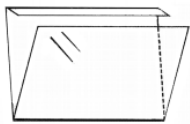

The Archive Holders are manufactured in acid-free and high strength material as a solution for bulk storage. They allow systematic and accessible control over an expanding collection. The Archive Holders are available in a wide range of sizes to fit various formats and numbers of storage issues.

The Corner Protectors are also manufactured in acid-free and high strength material to protect plain pictured canvas, frames, books and other delicate items. They are also available in a wide range of sizes to fit various requirements. The samples of holders and corner protectors represent a small fraction of available sizes.

## XI Large Polyester Enclosures and Storage

The A0 Standard Pockets, Covers, Folders & Sleeves fit perfectly in a whole drawer, or two A1 items can be fitted side by side with an optional drawer divider.

Trantec® Protection Units are manufactured in 250 Micron Polyester and are perfect solution for Heavy Duty requirements.

The large sizes of Polyester enclosures are completely inert and Acid-Free Polyester film. They are available in packs of 10.

*For mounting strips and tapes turn to Mounting Solutions on page 41.*

### 2 Horizontal Plan Chests

For storage of maps, plans, drawings and prints a Secol horizontal plan chest makes an ideal and secure environment for our polyester storage products. Based on A0 size drawers, these solid lockable cabinets in grey steel feature high quality ball-bearing extension slides to produce the smoothest of movements even when fully laden.

Each drawer possesses an index pocket for identification, and either 8 or 12 drawer versions fit in the same unit size, with the option of extension units to produce a double height combination chest. Plan Chests are available in red, grey, blue, black and many other colours.

## X Mounting Solutions

Secol provide the ideal material for mounting all kinds of paper and photographic presentations in books or on display.

Polyester film is glass clear for minimal visual intrusion, whilst at the same time archivally safe for direct and long-term contact with precious materials.

That is why the Mounting Solutions offer a secure archival structure for variety of different formats of material.

### 1 Mounting Board, Tissue and Border Mounts

**Mounting Inserts** are made from heavy-weight 315gsm board to provide a safe and stable base for mounting up all kinds of materials with the additional benefit that they can be annotated and labelled to maintain the complete story. They are ideal for use with Polyester A-S Pages, Binder & Security Style Pages, Standard and Comprehensive Pockets to securely store and display any precious collections of documents and photographs. The acid free board is ivory in colour, with slight calcium carbonate buffer to neutralize residual acidic material.

**Mounting Board** is 100% cotton fibre board and calcium carbonate buffered and surface sized. It is available in two thicknesses 110 and 160 gsm, in cream or black colour. The board is ideal for mounting and display work: drawings, photographs, prints and general conservation work as well.

Acid free **Board Tissue** is also 100% cotton fibre board and calcium carbonate buffered and surface sized. It is available in two sizes for various archiving applications.

**Border Mounts** in black colour, are available in many various sizes and shapes as bespoke service.

## 2 Mounting Strips and Tapes

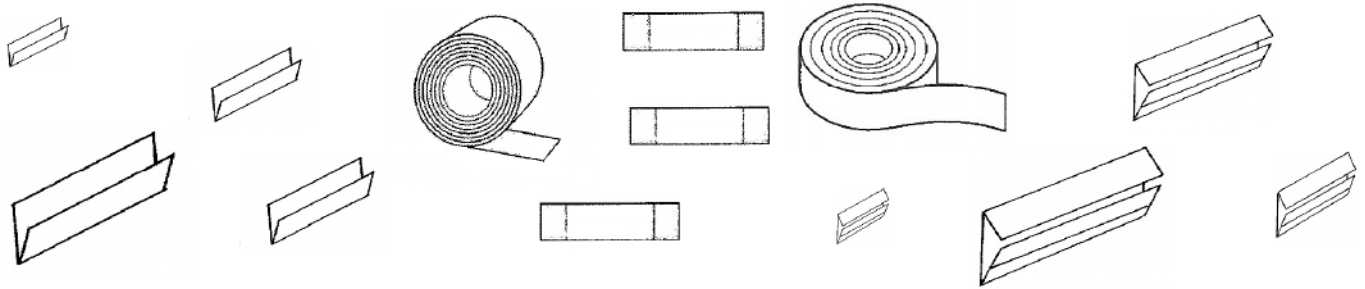

The **V-Mount Strips** can be cut and applied in any length to suit the particular material on Mounting Inserts or plain album pages. The mounted item is positively held within the V-shape with contact to polyester alone, yet can be removed safely at any stage if required. The unique clarity of Polyester film ensures the mount is discreet and unobtrusive.

**Single & Double Sided Tapes** are manufactured on a very thin carrier film of Polyester. They are exceptionally stable, so can be used for permanent mounting of items or fixing polyester display Pockets, Covers, Folders and Sleeves onto Mounting Inserts.

**Book Mark Strips** are ideal for use in book presentation work. They can be readily pre-folded to take up the exact shape of the book. Individual lengths can be gently folded round the volume to ensure it stays open where required. The 50 Micron Strip is light enough for the most delicate of requirements.

The **Philatelic Mounts** are designed as a complete all-round enclosure. They offer a complete archival protection to mounting and displaying stamps. Each 217mm philatelic strip can be cut to the widths desired. Each stamp is protected inside the polyester envelope which can be adhered to an album page using its built-in dry-mount peel off strip.

The stamp is hinged and protected completely, yet can be removed from the mount if required without any harm. The advantages are also an unrivalled clarity, total museum grade security and a complete absence of water for the dry-mounting.

## XI Archival Accessories

All the Secol accessories are acid-free. They are designed to provide professional protection and preservation of any paper and photographic archives and collections.

### 1 Interleaves and Board Tissue

The Standard Interleaves without Tabs are made of acid-free 160gsm Alpha cellulose paper, which is Ivory in colour with a slight calcium carbonate buffer. Interleaves With Tabs are also acid-free 1300 Micron 4-hole punched sheets. They are available in blue-grey or taupe boxboard. All Interleaves are available in any size as bespoke service so they can be use for a protective and visual barrier between pages and sections.

The Tissue 18 gsm is 100% cotton fibre board and calcium carbonate buffered. It is ideal for wrapping, interleaving and other archiving options.

NAME	DIMENSIONS	CATEGORY	PACK OF	REF. NO	SUITABLE FOR/APPLICATION
Interleaves A4 Without Tabs	320 x 260mm	160gsm Ivory Board	25	ASINLPWQ	Filing Pages/Separating, annotating, indexing
Interleaves A4 Without Tabs	320 x 260mm	160gsm Ivory Board	50	ASINLPW	Filing Pages/Separating, annotating, indexing
Interleaves A3 Without Tabs	440 x 340mm	160gsm Ivory Board	25	INLPWA3Q	Filing Pages/Separating, annotating, indexing
Interleaves A3 Without Tabs	440 x 340mm	160gsm Ivory Board	50	INLPWA3	Filing Pages/Separating, annotating, indexing
Interleaves A4 With Tabs	320 x 280mm	1300Micron Blue-Grey Board	8	IPD8A4	Filing Pages/Separating, annotating, indexing
Interleaves A4 With Tabs	320 x 280mm	1300Micron Taupe Board	8	IPD8A4T	Filing Pages/Separating, annotating, indexing
Board Tissue	500 x 750mm	18 gsm Cream Board	500	AFT500750G18	Wrapping, interleaving
Board Tissue	750 x 1000mm	18 gsm Cream Board	500	AFT7501000G18	Wrapping, interleaving

### 2 Labels, Index Cards and Marker Pens

Self Adhesive Labels are designed to complement our storage products. They provide a professional finish when printed with inkjet or laser printers from any standard software. The paper is very pale cream 100% Cotton Fibre, yet desktop printer friendly and the acrylic based resin adhesive is exceptionally stable.

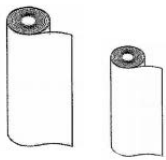

Spine Label Holders supply a flexible indexing system. The pockets come complete with card index which can be updated whenever the file's content are changed.

Two Sided Printed Index Cards are available separately in Packs of 50. Index Cards 120 x 155mm perfectly fit CD & DVD Archival Pockets 127 x 172mm (Turn to page 14 or 33).

The instant dry, highly stable Marker Pens have a fine 4mm writing point. They are useful for all types of marking.

NAME	DIMENSIONS	PACK OF	REF. NO	SUITABLE FOR/APPLICATION
Ink Jet Labels	27 labels 63x32mm	100	AFL3263	Binders, boxes etc./Labelling, indexing
Ink Jet Labels	9 labels 63x96mm	100	AFL6396	Binders, boxes etc./Labelling, indexing
Spine Label Holder	43 x 89mm	25	SLH4389F5	Binders, boxes etc./Indexing
Double Sided Printed Index Cards	146 x 100mm	50	ICD01	2 CD & 2 Index Pockets Pages/Indexing
Tamper Evident Security. Additional Labels	13 x 15mm	100	LB13M51	Slide Security Pockets/Prevention of unauthorized use
Black Marker Pen	0.4mm tip	1	MPBL1	Polyester, board etc./Marking
Green Marker Pen	0.4mm tip	1	MPGR1	Polyester, board etc./Marking
Red Marker Pen	0.4mm tip	1	MPRE1	Polyester, board etc./Marking

### 3 Polyester Rolls

Standard Polyester Rolls, available in 610mm and 1000mm widths are useful for producing individual enclosures in conjunction with Double Sided Tape 9 (see page 39). Secol Polyester Rolls in 75 Micron are also available in various formats as Bespoke Service.

*For a Request Form Turn to page 47.*

NAME	DIMENSIONS	CATEGORY	PACK OF	REF. NO	APPLICATION
Standard Polyester Roll	610mm x 25m	Polyester 75 Micron	1	PR610M25Y75	Individual enclosures
Standard Polyester Roll	610mm x 50m	Polyester 75 Micron	1	PR610M50Y75	Individual enclosures

## XIII Glossary of Terms

- 1. Binder Style Page**  
A polyester enclosure with holes, welded on three sides and open on one, separate binding and punched edge, access to storage material from top;
- 2. Cover**  
A polyester enclosure with no holes, welded on two adjacent sides
- 3. Folder**  
A polyester enclosure with no holes, welded on 1 long side and open on the other three
- 4. Hanging Style Page**  
A polyester enclosure with holes, welded on three sides and open on one, separate binding and punched edge, access to storage material from a binding edge
- 5. Page**  
A polyester enclosure welded on three sides and open on one; with holes
- 6. Pocket**  
A polyester enclosure with no holes, welded on three sides and open on one short side
- 7. Polyester**  
A condensation polymer formed by the reaction of a dicarboxylic acid with a diol followed by the elimination of H<sub>2</sub>O (or methanol).
- 8. Security Style Page**  
A polyester enclosure with holes, welded on three sides and open on one, access to storage material from punched edge
- 9. Sleeve**  
A polyester enclosure with no holes, welded on two parallel sides.
- 10. Trantec**  
A polyester enclosure with no holes, welded on 1 long side with a neat "captive flap" over the opposing edge

## XIV Polyester Properties and Archive Storage Guidelines

### POLYESTER PROPERTIES

1. Optical Transmission in the visible region of window glass.
2. Refractive Index 1.64 to 4.67
3. Melting Point 250 - 265 centigrade
4. Water vapour permeability, slight, 0.7g/m<sup>2</sup> 24 hrs/mm at 37.9 centigrade and 90% rh
5. Tensile Tear Strength (23 mu) 2800 kg/cm<sup>2</sup> at 25 centigrade (Higher than any other plastic film)
6. Propagated Tear Strength (23mu) 7.36N/mm
7. Initial Tear Strength (23mu) 250N/mm (Very much higher than PVC or Cellulose Acetate)
8. Folding Strength (23mu) 14,000 measured by M.I.T. at 1kg loading at 25 centigrade
9. Fungus Resistance, inert
10. Flammability, slow to self-extinguishing

### ARCHIVE STORAGE GUIDELINES

1. The Temperature ideally between 10 and 15 Centigrade. High temperatures can cause brittleness and mould growth, whilst temperatures too low can bring the risk of condensation, as can continual fluctuations in temperature.
2. The Relative Humidity (RH) should stay between 30 and 50% and wide fluctuations have the same dangers as temperature changes. High humidity is also associated with the problem of Glazing or Ferrotyping on photographic emulsions.
3. Avoid prolonged Exposure to both direct sunlight and standard fluorescent light which contain harmful UV Rays which cause yellowing of paper, fading of inks and rapid deterioration.
4. Original photographic prints are best stored in acid-free boxes and copies used for display where possible

## XV Request Form

PLEASE FILL IN THE FORM BELOW

(or complete online at [www.secol.co.uk](http://www.secol.co.uk)), describing your requirement in as much detail as possible.

All your details are stored securely and will never be released to third parties.

Send your completed form to:

Secol Ltd, Howlett Way, Thetford,  
Norfolk IP24 1HZ UK.

Fax: 01842 762 159 Email: [sales@secol.co.uk](mailto:sales@secol.co.uk)

We will contact you to discuss your requirements.

# Secol

## GIVING THE PAST A FUTURE

Secol was established in London in 1958 by Bertram Edward Charles Green and the company name arose from his deep vision and desire to enable people to see colours of precious archival collections and memorabilia.

After The Second World War, most of the Museums and Archives were looking for a better solution for preservation of their vulnerable materials. Consequently, Polyester film became a perfect medium for protecting, storing and presenting materials, whilst allowing their true colours to be seen.

The Company was relocated to Thetford in Norfolk in the 60's where it remains today, in a custom built factory. In 1992 Secol Limited, was awarded the Royal Warrant, for the supply of Archival and Photographic Storage Products to Her Majesty Queen Elizabeth II.

Many have tried to emulate its success but Secol Limited is still the unbeaten market leader. To keep meeting today's requirements, the company has recently undertaken significant capital investment in new machinery, allowing the range of products to be increased.

Now, Secol supplies archival products to the some of the world's foremost galleries, museums and photographic libraries, as well as to a wide range of private collectors and history enthusiasts.

We are proud of our loyal and well trained workforce and this cannot be overvalued in the current uncertain times.

All these factors play a key role in Secol maintaining its mission to treasure the past in the best possible way and to save it for future generations.
